

Onboard Diagnostics and Measurement in the Automotive, Shipbuilding and Aircraft Industries is a unique title which focuses on the direct (OBM) and indirect (OBD) determination of emissions in transportation. It offers the reader a state-of-the-art report on the recent developments on the determination of emissions and the estimation of concentration of pollutants in the exhaust pipe, using technologies such as intelligent micro controllers, micro sensors and micro actuators systems on board. Written by Dr. Palocz-Andresen, guest professor of Sustainable Transportation at Leuphana University in Luneburg, Onboard Diagnostics and Measurement in the Automotive, Shipbuilding and Aircraft Industries is especially useful in understanding how the European Union and the United States address the problem of transport-generated emissions. This book goes beyond the more common emissions issues encountered in the automotive arena (including light duty and heavy commercial vehicles), to expand upon the upcoming and similar concerns derived from air and sea transport. Onboard Diagnostics and Measurements in the Automotive, Shipbuilding and Aircraft Industries is a must-have source of technical information to those studying or working in the areas of transportation technology, sustainability, legislation, environment and climate protection.

The Trail of Blood, A Summary of Leave Your Mark by Aliza Licht, Amphitryon: or, the two Socias. A comedy. By Mr. Dryden., Lamb Goes In Town!!, Lamborghini, How to Make Great Homemade Natural Flavored Coffee, Love Is A Dance: Volume 1 in the Love Is A Dance Series,
